SUMMARY

BS Computer Networking & Security student with hands-on experience in networking and IT support. Skilled in network troubleshooting, switch and router configuration, access point management, VLANs, and TCP/IP fundamentals. Familiar with network monitoring, connectivity issue resolution, and basic network maintenance. Eager to contribute technical skills and a proactive approach to a Junior NOC Support role while continuing to develop expertise in network operations and infrastructure management.

EDUCATION

- BS Computer Networking & Security — SSUET
- Expected Graduation: 2027

TECHNICAL SKILLS

TCP/IP | IPv4 | Subnetting | DHCP | DNS | VLAN | LAN/WAN | Routers | Switches | Cambium | Ubiquiti UniFi | Grandstream | PoE | cnMaestro

EXPERIENCE

Network Support Engineer Intern — Dreams Network & Technology (DNT) Jul 2026 – Oct 2026 | Karachi

- Perform network troubleshooting and monitoring for switches, routers, wireless access points (APs), and client connectivity.
- Troubleshoot network connectivity issues related to TCP/IP, VLANs, DHCP, IP addressing, DNS, and wireless networks.
- Monitor AP performance, investigate connectivity issues, and perform firmware upgrades when required.
- Assist in switch port configuration, VLAN assignment, and basic trunk and access port troubleshooting.
- Monitor network availability and identify link-down events, interface flapping, packet loss, and high latency.
- Provide first-level technical support for network-related incidents and client connectivity complaints.
- Perform basic router and switch configuration, interface status checks, and connectivity testing.
- Assist in troubleshooting wireless signal issues, AP disconnections, and client authentication problems.
- Conduct basic network diagnostics using ping, traceroute, and other troubleshooting utilities.

- Monitor network devices and escalate unresolved incidents to senior engineers or the NOC team.
- Support IP address configuration, subnetting, default gateway, and DNS troubleshooting.
- Maintain incident records, document troubleshooting steps, and provide timely updates on network issues.
- Coordinate with technical teams to investigate outages and restore network connectivity.
- Assist with network device configuration backups, firmware maintenance, and routine health checks.
- Verify service restoration by performing connectivity tests and confirming network stability.

ACHIEVEMENTS

DNT Internship Certificate | TICE Project Third Position Certificate | Hifz-e-Quran Certificate

SOFT SKILLS

Communication | Problem Solving | Teamwork | Client Support
